

Criterion D – Evaluation

Potential Success Criteria of the Product	Did it happen? If not, why?
<ul style="list-style-type: none"> • User can input information when working on a new project <ul style="list-style-type: none"> ○ Information includes: <ul style="list-style-type: none"> ▪ Starting Date ▪ Budgeting ▪ Materials ▪ Costs ▪ Photos of property ▪ Problems that have occurred there (repairing, giving money on time, budgeting) 	<ul style="list-style-type: none"> ✓ ✓ x – Client didn't need this data ✓ x – Too complex ✓
<ul style="list-style-type: none"> • User can input information about the tenants they are dealing with. <ul style="list-style-type: none"> ○ Information includes: <ul style="list-style-type: none"> ▪ Tenants name ▪ Contacts of tenants ▪ Job ▪ Expiration dates of their contracts ▪ Number of people in household. 	<ul style="list-style-type: none"> ✓ ✓ ✓ ✓ x – Client didn't need this data.
<ul style="list-style-type: none"> • Input boxes do not clear data placed in Text Fields, just in case the user wants to make an instant adaptation. 	<ul style="list-style-type: none"> x – Client prefers text fields to be cleared after inputting.
<ul style="list-style-type: none"> • Pop-up windows of alerts of expiring contracts will come up 3 months in advance of the expiring date. 	<ul style="list-style-type: none"> x – Instead, a due date tab was created.
<ul style="list-style-type: none"> • User can modify categories to see on the data table. 	<ul style="list-style-type: none"> x – Separate tables were made for each tab

Evaluation Interview Results

Recommendation for Improvement	Benefits	Why/how Realistic
<ul style="list-style-type: none"> • “Can you make it work through the cloud?” • “I want it to work on my phone” • “Drop down menu for tenants I already submitted in” • “The saving is easy, but can you make the application automatically open the data right when I open the program?” 	<ul style="list-style-type: none"> • Easily accessible • Faster • Faster/easily accessible to data 	<ul style="list-style-type: none"> • Since we have not yet learnt how to create an application that enables the cloud, I am not able to do so. • Again, I have no learnt how to do this. • Doable • Doable

Things the user liked about the program:

- The due date tab – “Keeps my organized and I can see what I have to do, and when.”
- The way the tabs are organized – “It’s easy to understand, even if I give it to (another colleague) in the company.”

Extensibility

Further extensions I can make to this project include recommendations for improvement from the client himself. Also, I would like to add simple keyboard shortcuts into my program. For example adding a new tenant = cmd+T or a new due date = cmd+D, etc. Other possible keyboard shortcuts would be necessary for saving and quitting the application.

The list of recommendation that the client has offered has two ideas that will help my program be more accessible. I have no yet learnt how to make an application that works with the cloud or a phone; however, it is possible to do after being taught so. The other two ideas are very doable for me at this time. I can provide the option of a drop down menu of previous tenants (or other data) as well as allowing data being provided automatically when opening the application.
