

Q1. What does your work life sound like?

I can teach a lot of subjects as well as college application, my students range from 10- 25 in age. Some students are located in other countries. I can sometimes have up to 100 students in a week. I need a quick way to manage my students. They need to be arranged in terms of grades, subjects and many other criterias.

Q2. is connecting with these students a problem

Of course , I struggle sometimes because students are not supported at home by their parents, and students don't pay enough attention to meeting scheduled times.

Q3. top 3 things to looking forward to the program

Students can schedule a time to meet, a way to check when people come, seeing the progress of student grades in the form of a graph.

Q4. Do a lot of people miss their payments

A lot, and due to their own reasons

Q5. How would you feel if there is an application that keeps track of deadlines?

Definitely for undergraduate students, but for graduate students, not so much. By the way, students should be able to be deleted, added and searched.

Q6. How do you feel about some helpful features that help you work on the program?

Great! Stuff like what I did wrong, and how to fix it.

Q7. How about a "help button" that can establish instructions to the user and a "emergency help" to notify the developer directly?

That would be great.
