

Criterion E

Criteria For Success Table

Able to enter a student in the application.	
Able to delete a student in the application.	
Able to search up a student in the application.	
Two students can be pulled up by the user and a comparison can be done.	Comparison can be made in the table tab
Student scheduling time for an appointment.	Not possible to setup server
A divided view of the students.	
Students are separated and organized by the test they are taking and or age group.	
The user can sort the names of the students by alphabetical, low-high score and high-low score.	
The application includes an "emergency help" button, which notifies the developer directly.	Could not create a server, alternative through Email communication

Recommendation for Improvement	Benefits	Why/how Realistic
Detailed graph	Precise reading form the graph	Very realistic, add smaller scaling for graph
Multiple bars in the bar graph	Able to compare students across the graph	Hard, due to the nature of the jfreechart
More students	Just in case the client gets more students	Hard, could be a systematic problem
Short Cut for a quick email	Faster and more convenient	Easy, as long as if the client is using a desktop application of email

Word Count: 1841
