<u>**Transcript of Third Interview with Client**</u> *(conducted by the **author** - in bold)*

Hello Mr. Narayan, since our last interview, I have created the following program with the functions you had requested.

Hello, that's great. Could you run the program for me?

Sure. So this is what it looks like. *runs through the program*

You have done a great job with the special features, some of which I was not expecting. This is a very useful program for me.

1. Thank you, glad I can help. Do you have any feedback on the functionality of the program?

Just a few things I would like to recommend. First, a feature that I would really like would be to be able to see multiple time zone conversions simultaneously. Another thing that would be useful is a clock display as it is easier to see multiple international times together. And the last thing that I would like to suggest is an improved visual appeal. Other than that, the program looks good.

Thank you, this is great feedback. Thank you for your time once again, I am glad I could great a program that is useful for you.

Yes, I would like to be able to use the application as soon as possible. Thank you.
