

**Interviewer:** Hello! Today I am going to show you the final product of your closet organizing program. Could you please give me some feedback about what you think?

**Client answer 1:** Cool! Ok, I'll try it. Oh, cool, I really like the way you laid it out, it makes everything easy to see and use.

**Interviewer:** Ok, great! What else do you like about it?

**Client answer 2:** Well, I like how I can add and delete things and it's really easy. Like, you didn't even have to tell me how and I figured it out. I think it would be a little better if I could see the items in my closet laid out as each different type of clothing though, instead of just a whole list. But other than that, on this side where I input things, it works really well.

**Interviewer:** Nice, ok, I think something like that could be done, I'd just have to work more on figuring out the MySQL connections and how I could do that, but it seems reasonable. How about the outfit generator side of things? What did you think about that?

**Client answer 3:** Let me try it... Oh wow, that's really cool. Yeah, that's neat. I like how it gives me 2 options like we talked about and I feel like the clothes it gave me are actually going to look good together and I'll have the right stuff to wear for what I'm going to do.

**Interviewer:** Awesome, I'm glad you like it. Do you have any recommendations for me about it?

**Client answer 4:** Ummm... I think it would be cool if you could add a feature for me to save an outfit if I really liked it and wanted to make sure I could put it together again. Do you think you could do that?

**Interviewer:** Yes! I think I could add something like that. That's very similar to the closet database I already have running to display your closet. If I tweaked that a bit and added some more stuff that MySQL would need I think I could do that for you. That's a really great idea. Do you have any other ideas?

**Client answer 5:** No, I think this is great and I think I will definitely be using it in the future so I don't keep looking like a hot mess whenever I show up to something.

**Interviewer:** Hahahaha, I'm so glad you like it. Thank you for participating in this project for me, I had a lot of fun making this for you.

**Client:** Yeah, no problem. Thank you for making this for me! I think it can really help me with my outfits.
