

Q1: Hi, thank you again for agreeing to do this interview with me. Since I gave you the program to use it, I want to get some feedback from you.

A1: Sure, after I used it for a while, I found that it is very easy to use and understand. And it also has everything I asked for.

Q2: That is great to hear. When you were using the program, did you run into any bugs or glitches?

A2: Yes, once.

Q3: Can you tell me what happened?

A3: I think the program kind of didn't display the correct stats and match history when I put 0 as my number of deaths.

Q4: I see, I think I know what the problem is. Is there any other bugs or glitches?

A4: I don't think so.

Q5: Nice, do you have any suggestion or something you want to change in this program?

A5: Let me think real quick. I think it would be nice if you can make another filter that lets me sort my game besides just the character I played. For example, sorting from highest to lowest KDA or something like that.

Q6: Okay, okay. Is there something else?

A6: Oh, in valorant there are multiple game modes. I think it would be nice if I can filter out games by game mode just like choosing a specific agent.

Q7: Got it. Is there anything else you want to change in the program?

A7: No.

Q8: Well then, thank you so much for your time.

A8: No problem.
