

Question 1:

How often do you build your computers?

Answers:

We build it periodically, it depends on the grants we get from the school and from the PTA. Our most recent one was last year, we are asking for more grant this year and hopefully, we will be receiving the grant for 20 VR sets.

Question 2:

What is your responsibility in this department?

Answer:

I lead this project, basically from the grant to looking at how it fits into the school curriculum, building computers are also part of that responsibility.

Question 3:

Would it be functional if you have a program for you to check the specs of a vr-ready pc without going too in-depth to it?

Answer:

I think that will save us a lot of time and be very convenient

Question 4:

What are the particular tasks of your job that is very annoying or hassle to do?

Answer:

In terms of building a computer, the part that I struggle the most with is finding the right parts that have the best value. I want to find the cheapest parts that will last a long time.

Question 5:

So would it be beneficial for you if there's a guide that recommends you these pc parts, budget-wise and meets the criteria of being VR ready?

Answer:

Yes, that will be very beneficial

Question 6:

It would reduce the amount needed to research and reduce the hassle right?

Answer:

Yes
