Hi!

Thank you for sending the program over, I have used it and I have some feedback to give.

First of all, I think the application is fairly easy to use and serves its purpose of helping me predict the opponent's moves in Pokemon Showdown and really helps me with winning more games. The tips are almost always accurate and useful and I have enjoyed the Pokemon Showdown experience even more with the application. One particular aspect of the application that I like is how I am able to add different countermeasures as notes for the opposing pokemon team and I can have many ways to deal with different pokemon. Another aspect that I like about the application was how I could access the different teams I created very quickly.

However, one of the things you could change about the application could be the ability to paste an entire team at once instead of having to put in pokemon one by one. This will make the process a lot faster and easier for me.

Overall, great application and thank you for making this application for me. Looking forward to using the application a lot more often now!

Thanks for the feedback!

You're welcome!

Glad you like it!
